FINAL EXAMINATION

TRIMESTER 2, 2022/2023

BFN 1024 PRINCIPLES OF FINANCE

(All Sections/Groups)

4 July 2023
9.00am - 11.00am
(2 Hours)

INSTRUCTION TO STUDENTS

1. This question paper consists of THIRTEEN **(13)** pages (including this cover page) with:
   Section A: Thirty (30) multiple choice questions (60 marks)
   Section B: Three (3) working problems (40 marks)

2. Answer **ALL** questions.
3. Please write all your answers in the **MCQ test sheet** and **Answer Booklet** provided.

SECTION A (30 Multiple Choice Questions)

1. Which one of the following is an example of systematic risk?
A. investors panic causing security prices around the globe to fall precipitously
B. a flood washes away a firm's warehouse
C. a city imposes an additional one percent sales tax on all products
D. a toymaker has to recall its top-selling toy
E. corn prices increase due to increased demand for alternative fuels

2. Unsystematic risk:
A. can be effectively eliminated by portfolio diversification.
B. is compensated for by the risk premium.
C. is measured by beta.
D. is measured by standard deviation.
E. is related to the overall economy.

3. The primary purpose of portfolio diversification is to:
A. increase returns and risks.
B. eliminate all risks.
C. eliminate asset-specific risk.
D. eliminate systematic risk.
E. lower both returns and risks.

4. The common stock of Manchester & Moore is expected to earn 13 percent in a recession, 6 percent in a normal economy, and lose 4 percent in a booming economy. The probability of a boom is 5 percent while the probability of a recession is 45 percent. What is the expected rate of return on this stock?
A. 8.52 percent
B. 8.74 percent
C. 8.65 percent
D. 9.05 percent
E. 9.28 percent

5. You have a portfolio consisting solely of stock A and stock B. The portfolio has an expected return of 8.7 percent. Stock A has an expected return of 11.4 percent while stock B is expected to return 6.4 percent. What is the portfolio weight of stock A?
A. 39 percent
B. 46 percent
C. 54 percent
D. 61 percent
E. 67 percent

Continued...

6. The weighted average cost of capital for a wholesaler:
A. is equivalent to the aftertax cost of the firm's liabilities.
B. should be used as the required return when analyzing a potential acquisition of a retail outlet.
C. is the return investors require on the total assets of the firm.
D. remains constant when the debt-equity ratio changes.
E. is unaffected by changes in corporate tax rates.

7. Which one of the following statements is correct for a firm that uses debt in its capital structure?
A. The WACC should decrease as the firm's debt-equity ratio increases.
B. When computing the WACC, the weight assigned to the preferred stock is based on the coupon rate multiplied by the par value of the preferred.
C. The firm's WACC will decrease as the corporate tax rate decreases.
D. The weight of the common stock used in the computation of the WACC is based on the number of shares outstanding multiplied by the book value per share.
E. The WACC will remain constant unless a firm retires some of its debt.

8. The cost of preferred stock is computed the same as the:
A. pre-tax cost of debt.
B. return on an annuity.
C. aftertax cost of debt.
D. return on a perpetuity.
E. cost of an irregular growth common stock.

9. A stock has an expected return of 11 percent, the risk-free rate is 6.1 percent, and the market risk premium is 4 percent. What is the stock's beta?
A. 1.18
B. 1.23
C. 1.29
D. 1.32
E. 1.35

10. The length of time a firm must wait to recoup the money it has invested in a project is called the:
A. internal return period.
B. payback period.
C. profitability period.
D. discounted cash period.
E. valuation period.

Continued...

11. The present value of an investment's future cash flows divided by the initial cost of the investment is called the:
A. net present value.
B. internal rate of return.
C. average accounting return.
D. profitability index.
E. profile period.

12. It will cost RM6,000 to acquire an ice cream cart. Cart sales are expected to be RM3,600 a year for three years. After the three years, the cart is expected to be worthless as the expected life of the refrigeration unit is only three years. What is the payback period?
A. 1.48 years
B. 1.67 years
C. 1.82 years
D. 1.95 years
E. 2.00 years

13. Which one of the following costs was incurred in the past and cannot be recouped?
A. incremental
B. side
C. sunk
D. opportunity
E. erosion

14. Unsystematic risk:
A. can be effectively eliminated by portfolio diversification.
B. is compensated for by the risk premium.
C. is measured by beta.
D. is measured by standard deviation.
E. is related to the overall economy.

15. Samuelson Electronics has a required payback period of three years for all of its projects. Currently, the firm is analyzing two independent projects. Project A has an expected payback period of 2.8 years and a net present value of RM6,800. Project B has an expected payback period of 3.1 years with a net present value of RM28,400. Which projects should be accepted based on the payback decision rule?
A. Project A only
B. Project B only
C. Both A and B
D. Neither A nor B
E. Answer cannot be determined based on the information given.

Continued...

16. Fatimah Az Zahra has analyzed two mutually exclusive projects of similar size and has compiled the following information based on his analysis. Both projects have 3- year lives.

	Project A	Project B
Net present value	$81,406	$82,909
Payback period	2.48 years	2.31 years
Average accounting return	9.58 percent	9.53 percent
Required return	11.5 percent	12.0 percent
Required AAR	9.25 percent	9.25 percent

She has been asked for the best recommendation given this information. His recommendation should be to accept:
A. both projects.
B. project B because it has the shortest payback period.
C. project B and reject project A based on their net present values.
D. project A and reject project B based on their average accounting returns.
E. neither project.

17. Which one of the following best describes pro forma financial statements?
A. financial statements expressed in a foreign currency
B. financial statements where the assets are expressed as a percentage of total assets and costs are expressed as a percentage of sales
C. financial statements showing projected values for future time periods
D. financial statements expressed in real dollars, given a stated base year
E. financial statements where all accounts are expressed as a percentage of last year's values

18. The Fluffy Feather sells customized handbags. Currently, it sells 18,000 handbags annually at an average price of RM89 each. It is considering adding a lower-priced line of handbags that sell for RM59 each. The firm estimates it can sell 7,000 of the lower-priced handbags but will sell 3,000 less of the higher-priced handbags by doing so. What is the amount of the sales that should be used when evaluating the addition of the lower-priced handbags?
A. RM 146,000
B. RM 275,000
C. RM 413,000
D. RM 623,000
E. RM 680,000

Continued...

19. The option that is foregone so that an asset can be utilized by a specific project is referred to as which one of the following?
A. salvage value
B. wasted value
C. sunk cost
D. opportunity cost
E. erosion

20. Suzie owns five different bonds valued at RM36,000 and twelve different stocks valued at RM82,500 total. Which one of the following terms most applies to Suzie's investments?
A. index
B. portfolio
C. collection
D. grouping
E. risk-free

21. The systematic risk of the market is measured by:
A. a beta of 1.0.
B. a beta of 0.0.
C. a standard deviation of 1.0.
D. a standard deviation of 0.0.
E. a variance of 1.0.

22 Green Roof Motels has more cash on hand than its operations require. Thus, the firm has decided to pay out some of its earnings in the form of cash to its shareholders. What are these payments to shareholders called?
A. dividends
B. stock payments
C. repurchases
D. payments-in-kind
E. stock splits

23. HJ Corporation has excess cash and has opted to buy some of its shares of outstanding common stock. What is this process of buying called?
A. stock dividend
B. stock split
C. stock repurchase
D. stock recap
E. stock repeal

Continued...

24. Which of the following shareholders tend to favor a high dividend policy?
I. retired individuals
II. endowment funds
III. corporate investors
IV. investors with high dividend tax rates but low capital gains tax rates
A. I and III only
B. II and IV only
C. I, II, and III only
D. II, III, and IV only
E. I, II, III, and IV

25. The information content of a dividend increase generally signals that:
A. the firm has a one-time surplus of cash.
B. the firm has few, if any, net present value projects to pursue.
C. management believes earnings growth will be strong going forward.
D. the firm has more cash than it needs due to a decline in future orders.
E. dividends thereafter will be lower.

26. The Tanning Bed has 10,000 shares of stock outstanding with a par value of RM 1 per share and a market value of RM 8 per share. The balance sheet shows RM 10,000 in the common stock account, RM 60,000 in the capital in excess of par account, and RM 94,300 in the retained earnings account. The firm just announced a 100 percent stock dividend. What will be the value of the common stock account after the dividend?
A. RM 5,000
B. RM 10,000
C. RM 11,000
D. RM 15,000
E. RM 20,000

27. Which one of the following statements related to cash dividends is correct?
A. Extra cash dividends cannot be repeated in the future.
B. A dividend is never a liability until it has been declared.
C. If a firm has paid regular quarterly dividends for at least five consecutive years it is legally obligated to continue doing so.
D. Regular cash dividends reduce paid-in capital.
E. The dividend yield expresses the annual dividend as a percentage of net income.

Continued...

28. The length of time between the purchase of inventory and the receipt of cash from the sale of that inventory is called the:
A. operating cycle.
B. inventory period.
C. accounts receivable period.
D. accounts payable period.
E. cash cycle.

29. Which one of the following will increase net working capital? Assume the current ratio is greater than 1.0.
A. paying a supplier for a previous purchase
B. paying off a long-term debt
C. selling inventory at cost
D. purchasing inventory on credit
E. selling inventory at a profit on credit

30. As of the beginning of the quarter, SevenTen Sdn Bhd's (STSB) had a cash balance of RM 460. During the quarter, the company collected RM520 from customers and paid suppliers RM360. The company also paid an interest payment of RM20 and a tax payment of RM110. In addition, the company repaid RM140 on its long-term debt. Compute STSB's cash balance at the end of the quarter?
A. -RM110
B. RM 320
C. RM 350
D. RM 430
E. RM 490

(Total: 60 marks)

SECTION B (40 Marks) (Answer all questions. Show your working/calculation).

Question 1

The Board of Director Alfro Berhad is considering the following investment:-

Project A: Country Australia. Initial investment RM 350 million.
Expected cash flow of RM 190 million at year 1 and RM 270 million at year 2.
The required rate of return is 10%.

Project T: Country Turkey. Initial investment RM 190 million
Expected cash flow of RM 170 million at year 1 and RM 140 million at year 2.
The required rate of return is 12%.

Project V: Country Vietnam. Initial investment RM 230 million.
Expected cash flow of RM 160 million at year 1 and RM 190 million at year 2.
The required rate of return is 15%.

If Alfro Berhad has limited budget of RM500 million, which project should the company accept? Hint: Use Net Present Value (NPV) methodology. Explain your answer.

(Total: 12 marks)

Question 2

a) Bandung Fashions is expected to pay an annual dividend of RM 0.80 a share next year. The market price of the stock is RM 22.40 and the growth rate is 5 percent. Compute the firm's cost of equity.

(4 marks)

Continued...

b) Sepco Berhad's common stock has a beta of 1.6. If the risk-free rate is 5% and the expected return on the market is 10%, compute the company's cost of equity.

(4 marks)

c) Electronics Galore has 950,000 shares of common stock outstanding at a market price of RM 38 a share. The company also has 40,000 bonds outstanding that are quoted at 106 percent of face value. Compute the weight of the debt when the firm computes its weighted average cost of capital.

(6 marks)

(Total: 14 marks)

Question 3

a) You have invested 12,000 shares in Telekom Malaysia Berhad at RM5.00 each share. The dividend per share is RM 1.00 and the market value of the stock is RM 7.00. Compute:

i) Capital gain per share and total capital gain (in RM) **(4 marks)**

ii) Total Return (in RM) **(4 marks)**

b) Nusa Intan Berhad has sales of RM 836,000 and cost of goods sold of RM 601,000. The firm had a beginning inventory of RM 41,000 and an ending inventory of RM 47,000. Compute the length of the inventory period?

(6 marks)

(Total: 14 marks)

END OF QUESTION

Selected Formula

1. $NPV = \sum_{t=0}^{n} \frac{CF_t}{(1+r)^t} - \text{Co}$

2. $\text{E (R)} = \sum_{i=1}^{n} r_i \, P_i$

3. $\sigma^2 = \sum_{j=1}^{n} \left(r_j - \bar{r}\right)^2 \times P_{r_j}$

4. $WACC = (w_i \, r_i) + \left(w_p \, r_p\right) + (w_s \, r_s)$

5. $r_d = \frac{I + \frac{\$1000 - N_d}{n}}{\frac{N_d + \$1000}{2}}$

6. $r_{d \text{ after tax}} = r_d \, (1\text{-T})$

7. $r_s = R_F + [b \times (r_m - R_F)]$

8. $OC = AAI + ACP$

9. $CCC = OC - APP$

10. $EOQ = \sqrt{\frac{2 \, X \, S \, X \, O}{C}}$
